

# A Single Platform to Equip Teams and Manage Assets Globally

Firstbase lets you automate the lifecycle of every asset in your business, ensuring the right person has the right equipment at the right time, always. We get equipment to and from employees wherever they are in the world, providing a full history of actions taken on every device.

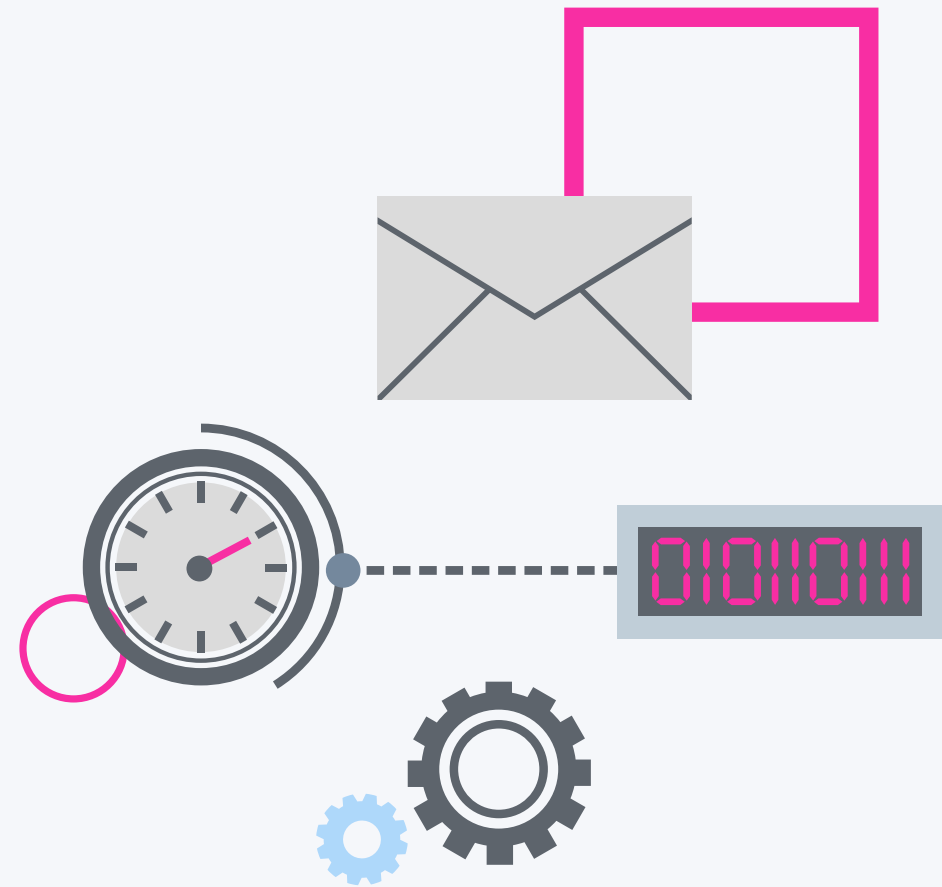

### Manage assets globally

Deliver optimal experiences across the entire employee journey beyond just onboarding. Build, support, and engage your workforce, powered by the Firstbase platform.

### All-in-one logistics solution

Firstbase saves you time by taking care off all your asset physical needs including returns, recycling, repairs, replenishment and imaging. Each task is at the touch of a button.

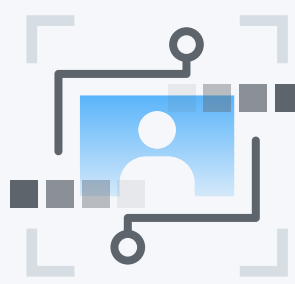

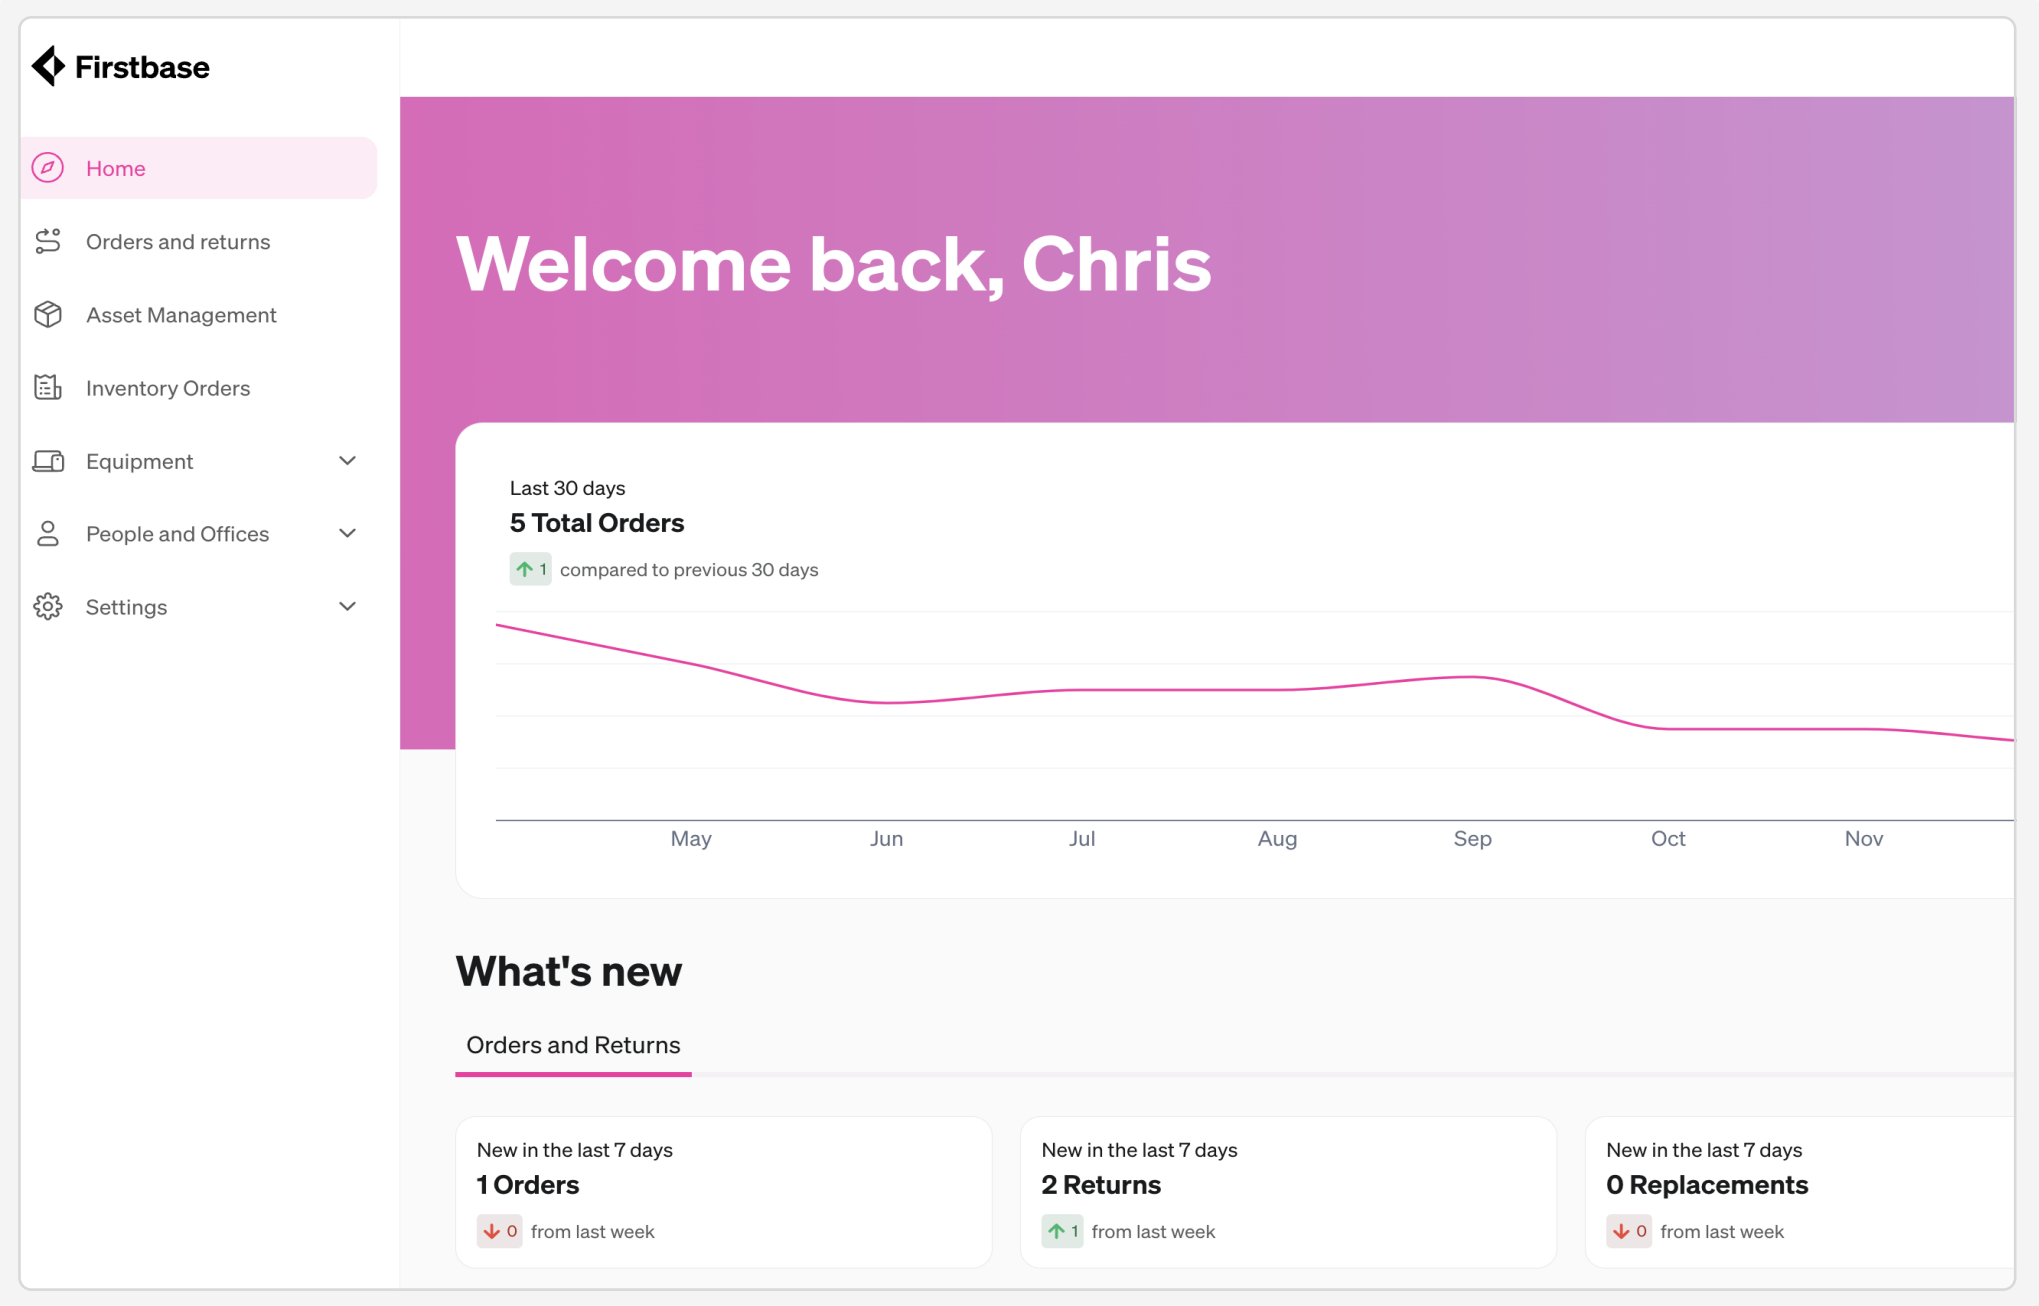

### Integrated with your apps

Over 20+ integration with the most common HRIS and ITSM platforms like Workday, UKG, Okta or ServiceNow allow you to automate your work tasks and have our platform handle them for you.

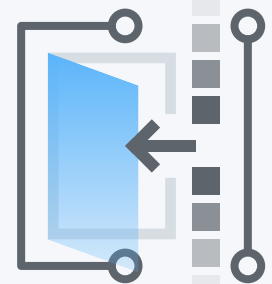

## Firstbase handles your most common asset lifecycle use cases

Firstbase fuses SaaS automation with a global physical operations engine, so you can turn your employee equipment lifecycle into a competitive business advantage.

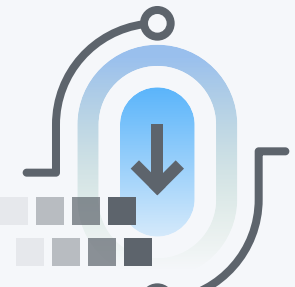

### Onboarding

Automate onboarding and let your employees choose from best in class devices, IT peripherals, and furniture in our self-service order portal, ensuring they get everything they need before day one.

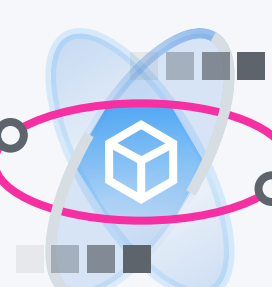

### Offboarding

Retrieve >97% of devices by allowing your employees to return equipment without having to leave their homes. Automate address confirmations, the shipment of retrieval kits and shipping labels.

### Reuse

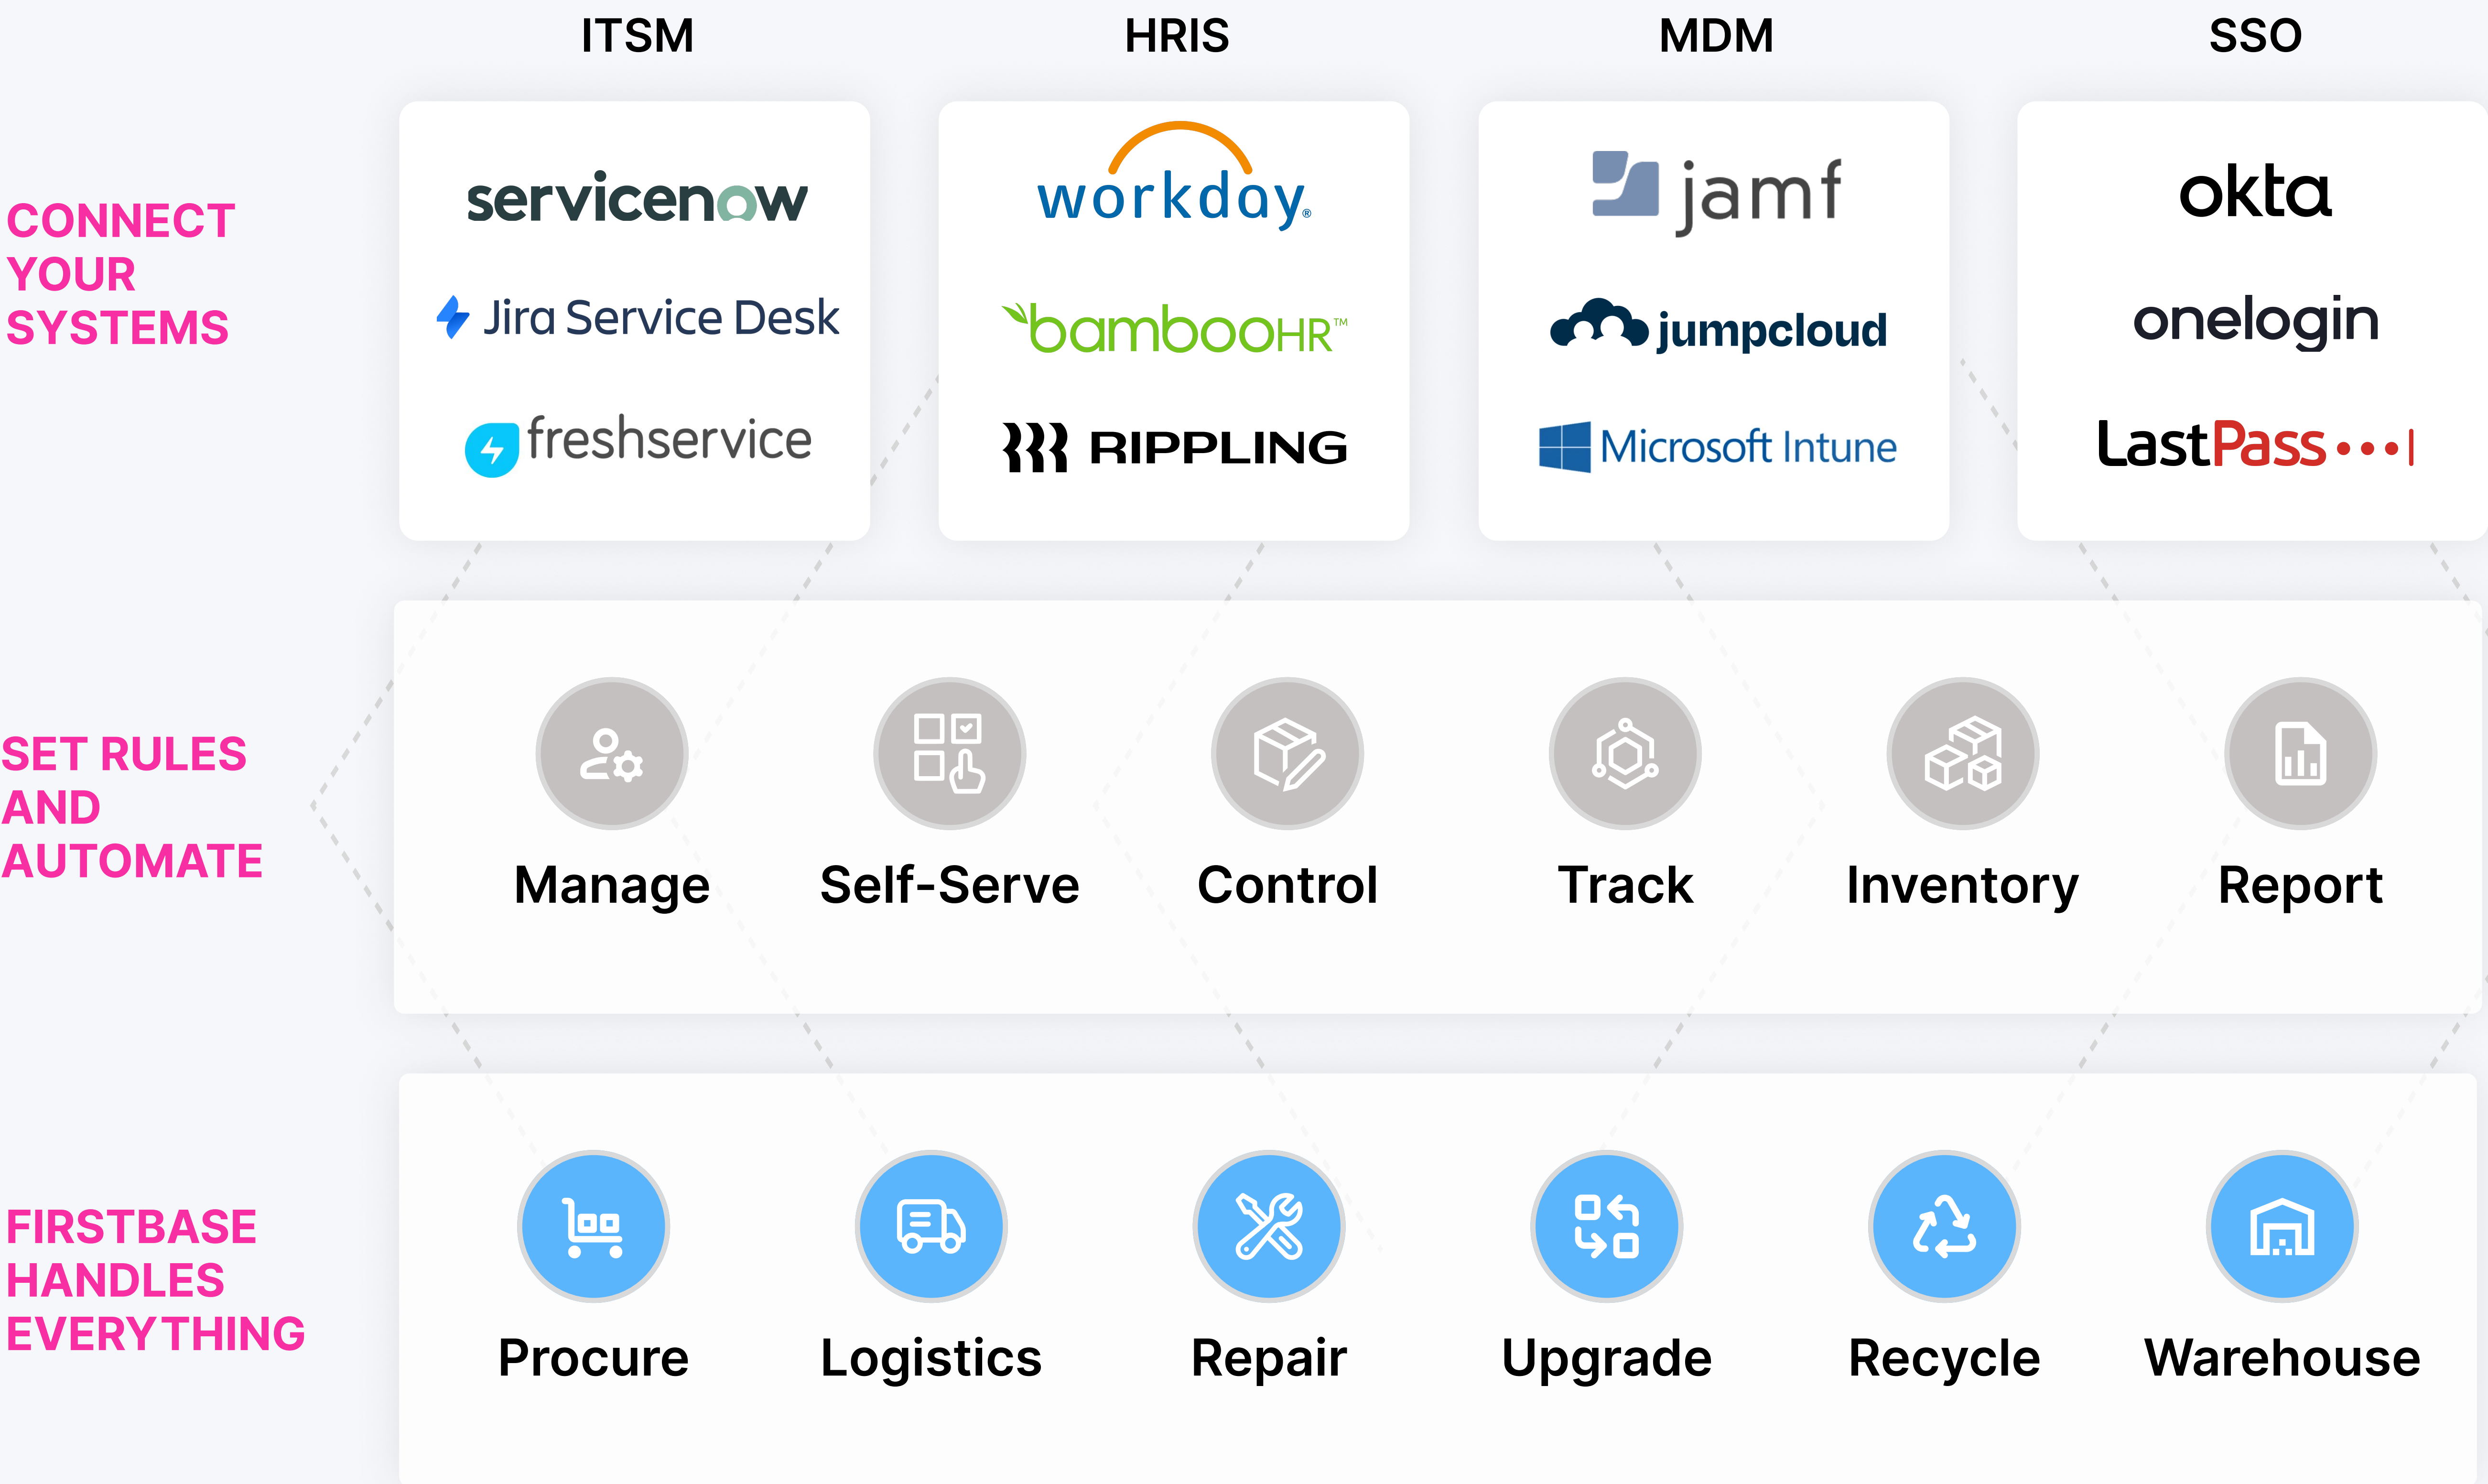

Extend the lifecycle of your devices. Each asset we recover gets cleaned, wiped and redeployed to the next user maximizing sustainability and cutting your carbon footprint

### Track

Securely keep track of all your assets in one place, including their location, status, condition and historical records of every change ever made to them.

## The Firstbase Platform provides a flexible, integrated solution that adjusts to your process needs
